Please add the following newly presented claims 44-94.

44. A method of transmitting a Carrier Interference Multiple Access (CIMA) communication signal comprising generating (14n) a plurality of electromagnetic carrier signals having a plurality of frequencies and modulating (12) the carrier signals with at least one information signal, the method characterized by:

phase offsetting (16n) each of the plurality of carrier signals wherein the phase offsets are incremental phase offsets, and

combining (24) the modulated, phase-offset carrier signals into at least one communication channel to generate interference between the modulated,
